Starport has teamed up with Snapology of Houston to offer science, technology, engineering, art and mathematics (S.T.E.A.M.). Snapology is a learning concept that combines play with education. We provided fun and engaging environments for children to learn science, technology, engineering, art and mathematics (S.T.E.A.M.), and literacy concepts using LEGO® bricks, technology and other tools. Additionally, students develop social, team building and problem solving skills, as they progress through our programs. Our mission is to provide children an opportunity to engage in “playful learning” activities that will stimulate their creativity and spark an interest in learning.
